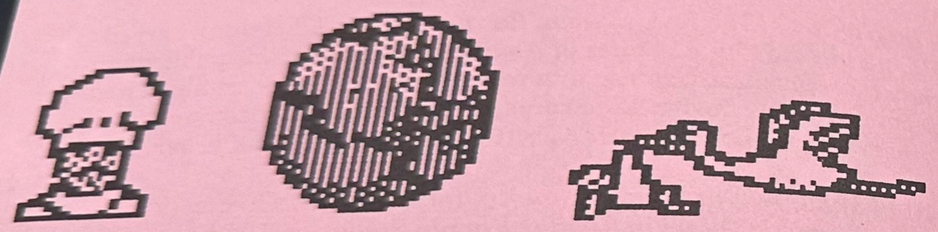
About the Disks

Stickybear Printer Picture Library 1 is a two-disk collection (red label and blue label) containing hundreds of backgrounds, frames, patterns, pictures, and fonts. **Note: Picture Library 1 is an add-on program which must be used in conjunction with the *Stickybear Printer* program.**



To Use

Boot your original *Stickybear Printer* disk according to the directions in the Printer manual. After the title panel, you can replace the *Stickybear Printer* disk with either the red or the blue-labled *Printer Library 1* disk. Remember that the *Printer Library 1* disk must be in drive 1 to be accessed by the program.

The blue and red library disks can be used interchangeably with the original *Stickybear Printer* disk, giving you a very wide variety of possible combinations.

You should place a write-protect tab on the two *Printer Library 1* disks to ensure that you don't wipe out any information while using the program. *Stickybear Printer* and *Printer Library 1* designs can also be used with pictures drawn using other graphics utilities.

Full Screen pictures can be created, loaded, and saved with the original *Stickybear Printer* or one of the *Printer Library 1* disks in drive 1. As with the original *Stickybear Printer*, you cannot save a design onto the *Stickybear Printer Library 1* disks because we have filled the disks with pictures, backgrounds, typefaces and borders for you to use.

To load and save pictures, use an initialized disk in drive 2 or insert the initialized disk in drive 1 while loading or saving. See pages17-18 in the original *Stickybear Printer* manual for more information about loading and saving pictures.

NOTE: When designing a **SPLIT SCREEN** or a **GREETING CARD** using items from the library disks, you MUST place the red or blue library disk in drive 1 when making your initial decision (SCREEN, SPLIT SCREEN, or GREETING CARD) at the Design Menu. This tells the program to keep track of the disk swapping you will do when making your design and is necessary because the program periodically stores information from your design on the original *Stickybear Printer* disk. The program will tell you when to swap disks. If you don't have a library disk in drive 1 when you select a **SPLIT SCREEN** or a **GREETING CARD**, you may find half your design on one disk and half on another disk. It would then be very difficult to get the program to print the entire design.

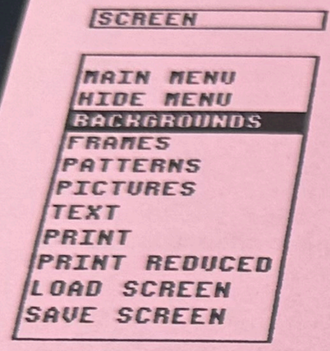
To Print

Configure the original *Stickybear Printer* disk to match your system, following the directions on pages 4 and 5 in the *Stickybear Printer* manual.

To print a picture while using a library disk, place the original *Stickybear Printer* disk in drive 1 when the program asks you to. After the screen is printed, you may continue using one of the *Picture Library 1* disks by inserting it in drive 1.

WEST BK

If you find yourself at a menu on the original *Stickybear Printer* disk when you want to be using one of the library disks, return to the menu below and then place a library disk in drive 1 before making your selection.



We hope that using the *Printer Library 1* data disks along with *Stickybear Printer* will help to expand your creativity.
